Education

Poornima University — **Jaipur, Rajasthan**
Bachelor of Computer Applications (Mobile Application & Information Security) — 2018–2021

Experience

Dotsquares — **Jaipur,Rajasthan**
Senior Unity & Mixed Reality Developer (Technical Lead) — Nov 2021, Sep 2026

- Architected and delivered 5+ Unity3D projects across mobile/iOS/Android, WebGL, VR, and AR, taking each from prototype to live release as sole or lead technical owner.
- Shipped Unity applications across gaming, enterprise, industrial AR, and healthcare simulation, adapting architecture to each domain's device and deployment constraints.

INVLABZ — **Andhra Pradesh, India**
Unity Developer Intern — Aug 2021 – Oct 2021

- Scripted physics-based interactions and animations in C# to simulate real-world physics experiments in Unity.

Projects

Airbound — 2D Arena Sports Game — **Google Play | itch.io**
Personal Project
Technologies: Unity, C#

- Architected and solo-developed a complete 1v1 arena game, owning complete gameplay architecture
- Built modular ability and interaction systems supporting Dash, Kick, Zip Wire, Shield, and Shield Wall with cooldowns, collision logic, and tactical arena control.
- Implemented cross-platform gameplay and mobile touch controls, with a loadout system allowing players to configure abilities and create different gameplay strategies (mobile build is now live on Android).

Virgin Atlantic Airlines Security Scanner — Magic Leap 2 (MR)
On-site MR trolley/baggage security screening tool
Technologies: Unity, Magic Leap 2 SDK, Object Detection API integration, QR/Marker Tracking

- Built the Unity-side pipeline streaming live MR camera feed to a remote object-detection service to flag prohibited items in airline service trolleys in real time.
- Implemented QR-based trolley identification to map scan results to physical trolley/compartment layout, with in-headset visualization of detection outcomes.

Medical MRI Training Simulator (VR)
Immersive VR healthcare training experience using Oculus
Technologies: Unity, Oculus SDK, VR Interaction Toolkit

- Simulated an end-to-end MRI scan workflow with interactive patient communication and tool handling (headphone handoff, scanner activation) for clinical staff training.
- Optimized interaction logic and rendering to maintain smooth VR performance during training scenarios.

SuperGas AR Plant Layout Planner
On-site AR tool for industrial layout planning and reporting
Technologies: Unity, AR Foundation, Addressables, UI Toolkit

- Built AR surface scanning with true-scale boundary marking to flag any of 20+ placeable 3D models exceeding the marked footprint.
- Included rotation, screenshot capture, form submission, and automated layout report generation for field surveys.

Skills

Expert: Unity (2D/3D), C#, VR/AR/MR Development, XR Interaction Toolkit, Game Design & Systems Balancing, Mobile Game Development (Android/iOS), WebGL, Version Control (Git, Plastic SCM)

Proficient: AR Foundation, Multiplayer Networking (Socket-based, Photon), Magic Leap 2 / Meta Quest SDKs, Game Optimization, Technical Scoping & Client-facing Delivery
